OPTIMU SATISFIES ALL YOUR COMPANY'S METROLOGY GOALS

Ergonomic and complete, Optimu provides all the functionality required by metrologists and adapts to different users' profiles.

Recognized for its excellence, Optimu is **the software standard for metrology professionals**. It meets their most complex needs, especially in calibrating instruments and optimizing periodicities.

FROM CALIPERS TO MULTI-GAS ANALYZERS, OPTIMU PERFORMS ALL TYPES OF CALIBRATIONS

Improve your efficiency by making all your calibrations directly in Optimu: it features all the advanced functions necessary to accomplish this task.

Because of its performance, Optimu is **the primary tool for many accredited laboratories**, impressed that it meets their rigorous requirements.

The **+** is for pharmaceutical processes:
Optimu is "FDA 21 CFR part 11 compliant."

FROM SMALL BUSINESSES TO MULTI-SITE COMPANIES, OPTIMU PROVIDES A COMPLETE DIGITAL ECO-SYSTEM

Managing all your installed instruments requires mastering the IT environment, technical environment, and legal requirements.

Opting for Optimu is a choice for simplicity. **The software deployment is easy**, without needing on-site Deltamu personnel.

By dialoguing with other software, **it quickly integrates into all your digital eco-systems**. Multilingual and user-friendly, Optimu is **designed to make life easier for your business and save you time**.

A CLOUD SOLUTION FOR MORE FLEXIBILITY

Optimu eService in SaaS mode is simplicity and performance at its best. Chosen by users, Optimu eService is a ready-to-use tool to help monitor all installed measurement and control instruments in your eco-system.
